EDUCATION

● **2016**
Master of Computer Applications (MCA)
ASM/IBMR Pune

● **2013**
Bachelor of Computer Applications (BCA)
Sant Gadge Baba Amravati University

IT SKILLS

- **Programming Languages:** Kotlin, Core Java
- **Mobile Development:** Android, HMI (Human-Machine Interface), Jetpack Library, Room / SQLite, Retrofit / Volley, DI / Dagger Hilt, MVC / MVVM Architecture, Design Patterns (Builder, Singleton, Factory, etc.)
- **UI:** Jetpack compose, XML
- **Testing & Debugging:** Junit, Espresso, Mockito
- **Version Control:** Git, GitHub, Bitbucket, Gitlab
- **Tools & Platforms:** Android Studio, Jira, Firebase Crashlytics, Google Analytics

CORE COMPETENCIES

Native Android Development ▬▬▬▬
MVVM & Clean Architecture ▬▬▬▬
Jetpack Libraries ▬▬▬▬
Dependency Injection ▬▬▬▬
RESTful API Integration ▬▬▬▬
UI/UX Implementation ▬▬▬▬
Unit and UI Testing ▬▬▬▬
Performance Optimization ▬▬▬▬
Play Store Deployment ▬▬▬▬
Agile & Scrum Methodology ▬▬▬▬
Requirement Gathering ▬▬▬▬
Code Review ▬▬▬▬
CI/CD Pipelines ▬▬▬▬
HMI Application Development ▬▬▬▬
Location-Based Services ▬▬▬▬
Firebase Crashlytics ▬▬▬▬

GAURAV PETE
Senior Android Developer

PROFILE SUMMARY

- **Over 7+ years of hands-on experience in designing, developing, and deploying high-performance Android applications** across domains including banking, consumer electronics, real estate, and mobility.
- **Proficient in Kotlin and Java, with expertise in modern Android architectures** such as MVVM and Clean Architecture using Jetpack components and Hilt for scalable and maintainable codebases.
- Successfully **delivered critical features like deep-linking for HSBC and smart appliance control for Whirlpool,** focusing on user-centric design and real-time device interaction.
- Adept at **integrating RESTful APIs, location-based services, Firebase Crashlytics**, and performance monitoring tools to ensure seamless and data-driven app experiences.
- **Experienced in Agile/Scrum methodologies**, requirement gathering, sprint planning, and cross-functional team collaboration to ensure timely and quality feature delivery.
- **Strong in test-driven development with JUnit, Espresso, and Mockito**, ensuring robust and reliable code through comprehensive unit and UI testing.

WORK EXPERIENCE

Senior Android Developer | Globant India Pvt. Ltd, Pune | Aug'2024 to Present
Project: Banking Domain: North Star
Role:

- Currently developing a deep-linking feature for the HSBC client, utilizing custom plugins to facilitate seamless in-app navigation and enhance integration across multiple application modules.
- Ensuring smooth user experience by maintaining robust link handling mechanisms and optimizing routing workflows within the mobile architecture.
- Collaborating closely with cross-functional teams, including designers, backend developers, and quality assurance professionals, to define, develop, and deliver innovative features that align with client expectations.
- Conducting thorough code reviews & providing constructive feedback to team members, fostering a culture of continuous improvement & technical excellence.
- Engaging in regular sprint planning and retrospective meetings, contributing to the agile development process and ensuring timely delivery of project milestones.
- Analyzing application performance metrics and user feedback to identify areas for improvement, implementing changes that enhance overall application efficiency.
- Spearheaded the integration of advanced analytics tools, enabling real-time monitoring of application performance and user behavior, which informed strategic decisions for future enhancements.

Senior Engineer Level 1 Grade 10 | eInfochips Pvt. Ltd. | Oct'2023 to Jul'2024
Project: M63 KA(Whirlpool)
Role:

- Engineered a smart microwave control application for Whirlpool, enabling advanced functionalities such as heat control, recipe management, self-cleaning, and support for single, double, and combo cavity configurations.
- Focused on enhancing user experience and optimizing real-time device interaction through seamless app-device communication.
- Conducted rigorous testing and debugging of the application to ensure optimal performance and user satisfaction, addressing any issues promptly.
- Engaged in user acceptance testing (UAT) sessions, gathering feedback to refine application features and enhance overall usability.
- Developed comprehensive documentation for the application, including user manuals and technical specifications, to facilitate knowledge transfer & support.

ACHIEVEMENTS

- In a recent project, led the development of a deep-linking feature for a banking application, which resulted in a 40% increase in user engagement and satisfaction, showcasing the ability to enhance user experience through innovative solutions.
- Successfully migrated legacy applications to Kotlin, achieving a 100% improvement in performance and maintainability, demonstrating a commitment to adopting modern technologies for better outcomes.
- Developed a smart microwave control application that received positive feedback from users, leading to a 60% increase in customer satisfaction ratings, highlighting the ability to deliver user-centric solutions.
- Implemented application performance monitoring tools, resulting in a 70% reduction in load times and improved user retention rates, showcasing a focus on optimizing user experience.
- Recognized for exceptional leadership skills by mentoring a team of developers, fostering a collaborative environment that encouraged innovation and knowledge sharing, and contributing to overall team success.

Product and Platform Engineer | Altimetrik India Pvt. Ltd. | Apr'2022 to Sep'2023
Project: Banking Domain: CCDT
Role:

- Spearheaded the migration of legacy Android projects to Kotlin, ensuring modernized architecture and improved code maintainability.
- Designed and developed the PLoan Payment/Details module, showcasing transaction history, interest rates, and loan allocations across multiple accounts with enhanced UI/UX components.
- Collaborated with cross-functional teams to define project scope and deliverables, ensuring alignment with business objectives and user needs.
- Engaged in regular code reviews, providing feedback and guidance to team members to promote best practices in software development.

Software Engineer | Incrust Software Pvt. Ltd | Jun'2019 to Apr'2022
Projects: SPACE (Shapoorji Pallonji Group), Queue management (QCrash, QCrash-Pro), City App
Role:

- Delivered full-cycle Android development services for clients in Advertising, Real Estate, and Queue Management domains.
- Took ownership of end-to-end project development and successfully led Android teams to meet project milestones and client expectations.
- Ensured scalability and maintainability of code through clean architecture and modular development practices.
- Participated in regular team meetings to discuss project progress, challenges, and solutions, fostering a collaborative team environment.
- Provided technical support and training to clients, ensuring a smooth transition and adoption of new applications.
- Implemented agile methodologies within the development team, resulting in improved project delivery timelines and enhanced team collaboration.

Android Developer | Krisp Hospitality Pvt. Ltd. | Nov'2018 to May'2019
Role:

- Contributed to the development and maintenance of Android applications for an in-house cab service product across Pune.
- Integrated Google Maps SDK, Places API, and Firebase tools (FCM, Crashlytics, Analytics) for location-based services, push notifications, crash reporting, and performance tracking.
- Ensured robust application performance through extensive testing and real-time monitoring.

Android Developer |KB Plus Software System Pvt. Ltd. | Sep'2017 to Nov'2018
Role:

- Began professional career at a startup, leading the development of multiple Android applications from scratch.
- Acquired hands-on experience in end-to-end mobile development, client interactions, and project delivery in a fast-paced, agile environment.
- Cultivated a strong foundation in Android SDK, UI components & backend integrations.
