Revenues	65.2	44.5	111.7

Key Challenges:

- **Increase in raw material cost:**
 - From Q3 FY21, raw material prices have seen an increasing trend, which resulted into ~7%-10% increase in overall manufacturing costs
 - Compared to last year, prices of key raw material have increased by more than 50%, impacting the profitability of the company
 - During the quarter, company partially increased its selling price
 - In the coming quarters looking at the raw material trend, company will decide on the future pricing strategy
- **Increase in Other Expenditure:**
 - Increase in the freight cost was largely due to
 - Disruption in transport facilities due to COVID-19 2nd wave
 - Increase in diesel prices

Commenting on the Results, Mr. Ashok Gupta, Managing Director, Shalimar Paints said,

“It has been a challenging year and the company has witnessed a disruption that had a devastating impact on the Company’s performance. Despite the initial phase of reopening of the economy, the unforeseen challenges & crisis of 2nd wave of COVID-19 hit the pause button again.

Commodity prices too witnessed an unprecedented surge. The company has felt the impact of increasing raw material cost over the past few quarters. Also there has been some disruption in transport facilities leading to an increase in freight cost. These all factors have impacted our profitability.

Unlocks, and the big sentiment booster of vaccination rollout are expected to spur consumer spending and boost business confidence. The pandemic also brought about certain fundamental shifts in the industry. Home improvement and focus on health & hygiene are expected to remain key growth catalysts. With the uptake in the real estate sector on the back of consumers buying houses we expect volumes to pick up in the coming quarters.

We believe we are working in the right direction for a long-term sustainable growth”.
