Objective

Quality Control & Research Professional with 6+ years of experience in optimizing product quality and processes. Skilled in identifying improvements, implementing corrective actions, and driving efficiency through strong analytical, communication, and organizational skills.

Skills

- Corrective and Preventive Action (CAPA)
- ISO Standard & Audit
- GMP /GLP Standards
- Risk Assessment
- SOP Development
- Troubleshooting at component level
- Literature Review and Research Analysis
- Additive Integration
- Market research for product development
- Quality inspection & Documentation

Experience

The Standard Products MFG Co.

Research & Quality Control Chemist October 2020 – Present

- Conduct chemical experiments to support product development, process optimization, and scaling and cost cutting.
- Oversee calibration and maintenance of laboratory equipment and instruments.
- Lead investigations into non-conformities in products or processes and implement corrective actions.
- Develop and improve formulations and processes for new products, ensuring alignment with market trends.
- Perform routine testing on raw materials, in-process samples, and finished products to ensure compliance with specifications and quality standards.
- Collaborate with cross-functional teams, including production, to troubleshoot and resolve process-related issues.
- Monitor and maintain quality control parameters throughout the production process to ensure product consistency.
- Prepare technical reports, test data, and quality control documentation.
- Ensure compliance with ISO, GMP, and other relevant quality management systems and standards.
- Conduct material characterization studies of new products to assess properties, performance, and suitability for commercial use.

Quality Control Chemist

September 2016 – October 2018

- Inspected finished products to verify compliance with customer specifications and industry standards.
- Conducted quality control testing on raw materials (such as solvents, PVC resins, epoxy resins, and silicone sealants) for incoming quality assurance.
- Performed shelf-life testing to ensure product durability and effectiveness over time.
- Developed and implemented standardized procedures for product testing, evaluation, and precision control.
- Identified non-conformities through testing and performed root cause analysis to recommend corrective actions.
- Monitored production lines to ensure consistent quality and conformity to quality standards.
- Conducted internal audits of systems, processes, and products to assess the effectiveness of quality control practices.
- Prepared and maintained essential documentation, including Certificates of Analysis (COA), Technical Data Sheets (TDS), and Material Safety Data Sheets (MSDS).
- Addressed customer complaints related to product performance and worked to resolve issues in a timely manner.
- Analyzed inspection data and recommended process adjustments to improve product reliability and consistency

Education

MSc (Organic chemistry)Sathaye college , Mumbai

7.3 CGPA

2020

BSC (Chemistry) Bhavan's college Mumbai

6.9 CGPA

2016

Project

Master's Thesis: Review on Synthesis, Characterization, and Antimicrobial Properties of Silver Nanoparticles.

Personal information

Gender: Female

Place: Mumbai

Date of birth: 07/03/1994
